

CASE STUDY: MIRVAC'S NEW COLLINS STREET DEVELOPMENT

NJM Group was founded in 1992 with six employees operating out of a 32m² facility providing services to universities and manufacturers in Victoria and Tasmania.

Today, the company has expanded to service the mining industry, railway stations, local councils, shopping centres and many more industries Australia wide. We manufacture and distribute products from our 1,700m² warehouse and factory in Heidelberg West. Our range of products include:

- Bollards
- Handrails
- Bike racks
- Speed humps
- Wheel stops
- Variable rate boards
- Steel staircases and structural steel beams.

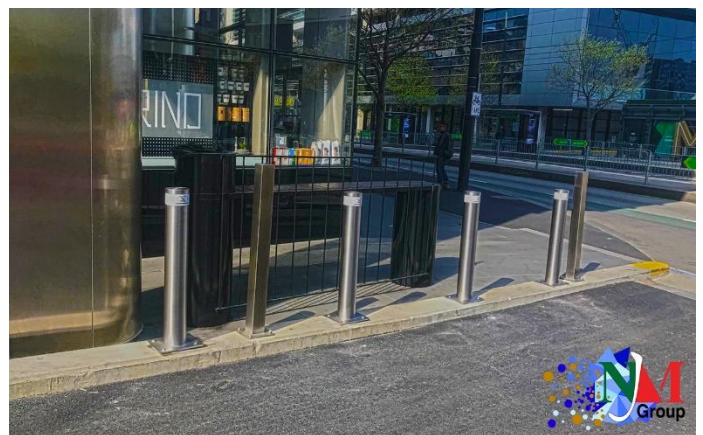

We also provide engineering services for steel fabrications, general steel repairs and deliver building and office maintenance and renovations.

**We Stock. We Supply. We Deliver. We Site Install. We Maintain.
Australia Wide.**

AUSTRALIAN BOLLARDS 2018

Australian Bollards – First-Class CBD Protection

Australian property group MIRVAC's new Collins Street development has become the most recent business in the CBD to receive tailored security solutions by Australian Bollards. Our installation of high-impact anti ram-raid stainless steel bollards now protect the development to give peace of mind to staff, visitors and businesses operating in the area.

MIRVAC's new Collins Street development

Australian Bollards also protects the CBD during events by providing quick, deployable and convenient leasing solutions at crowded public spaces. Our Event Bollards also come with ballistic covers which are compliant with section 3.8 of the international PAS68 standards to protect pedestrians and event-goers from debris.

For more information on how Australian Bollards can deliver and install our turnkey public security solutions, download a brochure or, visit our Products Page or call us on +613 9459 3488 today.
